

Wicked Fast Internet Deploys Aviat WTM 4818 Multi-Band

December 11, 2019

The Industry's Only Single Box, Multi-Band Solution Delivers 10Gbps Backhaul with Ultra-High Reliability

AUSTIN, Texas, Dec. 11, 2019 /PRNewswire/ -- Aviat Networks, Inc. (NASDAQ: AVNW), the leading expert in wireless transport solutions, today announced successful rollout of its single box WTM 4800 Multi-Band radio by Wicked Fast Internet in Park City, Utah, USA.

A new customer to Aviat, Wicked Fast Internet has completed the deployment of its first WTM 4818 Multi-Band link, exhibiting 10Gbps performance over nearly a six-mile path distance. This radio combines 80GHz with 18GHz in a single, compact radio unit operating over a single antenna, delivering high capacity and significantly more uptime than could be possible with e-band alone.

"We are very impressed with the performance of Aviat's new Multi-Band technology," said Trevor Adrian, Chief Executive Officer of Wicked Fast Internet. "The radio enables us to run more capacity and at longer distances while keeping the link in service longer. In addition to the radio platform, the Aviat Design cloud-based planning tool makes it easy to plan our new Multi-Band links with just a few clicks of the mouse. This real-world deployment is delivering exactly as promised, even in heavy snowstorms, and we are excited to install more of this technology across our footprint."

"We are thrilled with our new Multi-Band technology as evidenced by Wicked Fast Internet's seamless rollout to service their customers. Our solution offers the market a unique opportunity to deliver the capacity and reliability requirements of emerging 5G transport networks, and we are seeing tremendous demand worldwide," said Stan Gallagher, Aviat Networks Interim Chief Executive Officer and Chief Operating Officer.

About Aviat Networks

Aviat Networks, Inc. is the leading expert in wireless transport solutions and works to provide dependable products, services and support to its customers.
