

Harris Stratex Showcasing "Full-Blown 4G" at Mobile World Congress

Research Triangle Park, NC – February 12, 2009 - Harris Stratex Networks, Inc. (NASDAQ: HSTX), Harris Stratex Networks, a leading specialist in backhaul solutions for mobility and broadband networks, will showcase a “full-blown 4G” solution at the Mobile World Congress 2009 show in Barcelona, Spain, February 16–19.

The showcase will feature a live, end-to-end network demonstration of a converged services platform. The demonstration network will include a complete 4G broadband wireless ecosystem using the advanced WiMAX 802.16e standard, and will include key core elements of a wireless services gateway, core services gateway, IP wireless backhaul, mobile base stations, fixed and mobile subscriber stations—all under a single Harris Stratex umbrella management solution.

Look for the demo at the Fira de Barcelona in Hall 2, booth #2F27.

“All of the constituent elements are deployable now and may be used to form a greenfield solution or a broadband services overlay to any existing network,” said Harald Braun, Harris Stratex president and CEO. “Our complete solution enables the introduction of incremental fixed and mobile broadband services, resulting in increased revenue streams from an expanded subscriber base”.

At the show, Harris Stratex will unveil breakthrough technologies designed to enhance its market-leading Eclipse wireless IP platform and support the rising backhaul demands expected during the transition to 4G. New features and capabilities on display will include greatly increased nodal and link capacities for native Ethernet/IP traffic. Other capabilities include an innovation that enables operators of existing 2G/3G networks to get the highest possible capacity from their expensive frequency spectrum investment while preparing for packet networking at the same time.

About Harris Stratex Networks, Inc.

Harris Stratex Networks, Inc. is a leading specialist in backhaul solutions for mobility and broadband networks. The company offers reliable, flexible and scalable wireless network solutions, backed by comprehensive professional services and support. Harris Stratex Networks serves all global markets, including mobile network operators, public safety agencies, private network operators, utility and transportation companies, government agencies and broadcasters. Customers in more than 135 countries depend on Harris Stratex Networks to build, expand and upgrade their voice, data and video solutions. Harris Stratex Networks is recognized around the world for innovative, best-in-class wireless networking solutions and services. For more information, visit www.HarrisStratex.com.
