Harris Stratex Networks' Eclipse Platform Receives Wireless Backhaul Distinction Award

Significant milestone for packet node high-speed IP wireless backhaul platform

RESEARCH TRIANGLE PARK, N.C. – October 21, 2009 – Harris Stratex Networks, Inc. (NASDAQ: HSTX), a leading provider of wireless solutions that enable the evolution of next-generation fixed and mobile broadband networks, has been honored with the 2009 Wireless Backhaul Distinction Award from Technology Marketing Corporation (TMC) and Crossfire Media for the Eclipse™ Packet Node high-speed IP wireless backhaul platform.

Harris Stratex Networks was awarded following its successful demonstration of commitment to innovation towards the 4G Wireless Evolution. The Eclipse™ Packet Node is the industry-leading wireless backhaul solution for mobile operators who want to be '4G-ready' and provide the next generation of mobile broadband services. The platform seamlessly supports TDM, as well as carrier-grade Ethernet data traffic, via scalable Liquid Bandwidth™ software. The extensive use of nodal architecture provides carriers with the ability to configure TDM or Ethernet services as and when they are required.

"Eclipse Packet Node is quite extraordinary and certainly impressed our panel of judges," said Rich Tehrani, CEO, TMC. "It is an honor to bestow this award to Harris Stratex, and we certainly look forward to seeing more exceptional solutions from the company in the future. TMC is proud to recognize such excellence within the 4G industry."

"Network operators today face a major challenge regarding how to migrate their voice and data networks into a single, converged, data-centric network," said Stuart Little, Director, Corporate Marketing, Harris Stratex Networks. "The Eclipse platform supports all types of traffic, from low-capacity PDH to high-capacity SDH/SONET or Gigabit Ethernet services. The 'Wireless Backhaul Distinction Award' underlines the platform's global reputation for being the most comprehensive wireless backhaul solution available."

Carl Ford, co-founder and community developer, Crossfire Media, stated:"Harris Stratex Networks deserves the recognition for their achievements in advancing 4G and providing genuine solutions in the marketplace. The Eclipse™ Packet Node high speed IP wireless backhaul platform is impressive and has proven its customers have experienced success from utilizing its wireless backhaul technologies."
